The ME-110AT is the All Terrain version of our Large Outboard Service Stand. It features the same large foam filled rubber tires as the ME-140AT, which easily roll over gravel, grass, hoses, and concrete. Two of the wheels lock for maximum stability. The stand's mounting surface simulates a transom, both in angle and thickness, keeping the outboard naturally oriented while you work. The uprights are angled toward each other on either side of the engine to maximize accessibility. Fits all standard bolt-on outboard motors, generally up to 300/350 hp. **The ME-110AT has a maximum weight capacity of 700 lbs**, slightly less than the regular [ME-110](#) at 800 lbs.

Be sure to check out our battery tray accessory ([ME-110-01](#)) which has an innovative design allowing it to sit freely in the front of the stand.

Hot-dip Galvanized 110AT

Also available is a hot dip galvanized version of the ME-110AT for more corrosive environments. Hot dip galvanized is incredibly durable and coats both the inside and outside of all tubing and parts for the ultimate protection. To order a galvanized version of the ME-110AT, simply find the 2 gray boxes above the "Add to cart" button seen at the top of this page. Choose the second box labeled Galvanized, by default Red Powdercoat is selected. Please note that as we do not stock many galvanized products, there may be a 1-2 week lead time before shipping.

- ME-110-01 Battery Tray You can also add our our battery tray accessory ([ME-110-01](#)) which has an innovative design allowing it to sit freely in the front of the stand. To add this to your order you may go to it's product page or simply find the second drop down option above "Add to Cart" and select "1 Battery Tray" instead of the default No. If you'd like a galvanized battery tray please contact us to see if any are in stock.

- ME-110-Tool Tray You can also add our our tool tray accessory ([ME-110-Tool Tray](#)) which slides in to hang at the top of the stand. To add this to your order you may go to it's product page or simply find the third drop down option above "Add to Cart" and select "1 Tool Tray" instead of the default No.
