The All-Terrain Outboard Motor Dolly will allow you to get your **clamp-on** outboard motors , up to approximately 50 hp, transported over rugged terrain and it will fit through any standard doorway. Features large 10 x 3 inch foam-filled tires that allow for smooth movement even when the surface is rough. The foam-filled tires also provide maximum stability and you'll never run into the issue of getting a flat tire, unlike comparable air-filled tire models. Features a unique braking system to help your dolly stay put.

*Please Note: Antique Motors may not be the modern dimension, please check if they will fit a 2" transom.

Small Bolt Holes Features small bolt holes for optional additional stability of the clamp on outboard

Please note this hole pattern may not be standard on Galvanized units, please contact us or specify when ordering if you need them

Tie Down Anchor Spots Features tie down anchor spots for safety during possible moves in a vehicle

Please note this hole pattern may not be standard on Galvanized units, please contact us or specify when ordering if you need them

2" Wide Mounting Transom

2" Wide Mounting Transom The ME-140 mounting transom is 2 inches wide. Antique motors may not be the modern standard dimension and should be checked if you plan to use this stand for one.

Hot-dip Galvanized 140AT

We are proud to offer a new hot dip galvanized version of the ME-140AT for the more corrosive environments. Hot dip galvanizing is extremely durable and coats both the inside and outside of all tubing and parts for the ultimate protection. To order a galvanized version of the 140AT, simply find the 2 gray boxes above the "Add to cart" button seen at the top of this page. Choose the second box labeled Galvanized, by default Red Powdercoat is selected. Please note that as we do not stock many galvanized products, there may be a 1-2 week lead time before shipping.
