Description

ME-140 Transportation Cage - ME-140CAGE

The ME-140CAGE fits our [ME-140](#) to keep your outboard safe from damage during long transportation trips on a truck or trailer. The ME-140 will roll into the cage and is secured in place with 4 rubber coated brackets and hitch pins. A moveable collar snugs up to the outboard to keep it from shifting. Use the 2 back wheels of the ME-140 to tilt back and roll the cage wherever it needs to go (like a 2 wheeled dolly). You may fasten multiple cages together with the included 4 Cage Connector Brackets.

The ME-140 Cage has been specifically designed to fit one of our ME-140's with a [RAIDER 40](#) or [RAIDER 50](#) Outboard on the dolly, but it may well fit other motors. Please contact us if you have any concerns about your outboard fitting.

The ME-140CAGE is made to order and has a month and a half or longer lead time. It is sold as a seperate accessory for the ME-140 line of products - it does not include the ME-140.
